

EXPERIMENT - 8

NAME : YUVAN S

ROLL NO: 240701614

1) Title Medicine Reminder App – Wireframe Storyboard

2) Introduction

This storyboard represents the user flow of a Medicine Reminder App. It illustrates how a user interacts with the system to manage daily medicine schedules. The wireframes are designed in a low-fidelity style to focus on functionality and navigation rather than visual design.

3) Objectives

- To help users remember to take medicines on time
- To provide an easy way to add and manage reminders
- To track completed and missed medicines
- To create a simple and user-friendly interface

4) Features of the Application

- User login for secure access
- Display of daily medicine schedule
- Add new medicine reminders with date and time
- Notification alerts for reminders

- Option to snooze or dismiss alerts
- History tracking of completed and missed medicines

5) User Flow Description 1. Login Screen

The user enters their username and password to log in. This ensures secure access to personal medicine data.

2. Home Screen (Medicines List)

The home screen displays the list of medicines along with their scheduled time. The user can view all reminders and navigate to add new ones.

3. Add Reminder Screen

The user enters details such as medicine name, date, and time to create a new reminder. This allows easy scheduling of medicines.

4. Alert Screen

At the scheduled time, the app shows a reminder notification. The user can choose:

- Take Now
- Snooze
- Dismiss

5. History Screen

The history screen displays past records of medicines. It shows whether the medicine was completed or missed, helping users track their routine.

6) Advantages

- Simple and easy to use
- Helps maintain health discipline
- Reduces chances of missing medicines
- Provides clear tracking of medication history

7) **Conclusion**

This storyboard clearly explains the working of a Medicine Reminder App. It provides a smooth and user-friendly flow from login to managing reminders and viewing history, making it useful for daily healthcare management.
