Task Analysis

Task Analysis is the process of breaking down the user's interaction with the system into smaller steps to understand how the user completes a task.

It helps to identify user goals, required actions, and possible problems while using the system.

Key Aspects of Task Analysis:

- Understanding what tasks the user performs.
- Identifying the sequence of actions.
- Finding possible errors or retry steps.
- Improving user experience.

In this project, the task analysis is done for a Bus Booking Application where the user books bus tickets online.

User Flow

User Flow is a diagram that shows how the user moves through the system to complete a goal.

It shows the order of screens and decisions taken by the user.

User Flow for Bus Booking App

Start → Open Bus Booking App → Login / Signup → Enter Source & Destination → Select Travel Date → Search Buses → View Available Buses → Select Bus → Select Seat → Enter Passenger Details → Choose Payment Method → Payment Page → Payment Successful? → Retry Payment / Confirm → End

Step-by-Step Explanation

Step 1: Start

- The user opens the Bus Booking Application.

Step 2: Login / Signup

- The user logs into the account.
- If the user is new, they create an account.

Step 3: Enter Source and Destination

- The user enters boarding place and destination.

Step 4: Select Travel Date

- The user selects the date of travel.

Step 5: Search Buses

- The system shows available buses for the selected route.

Step 6: View Available Buses

- The user checks bus timings, price, and seat availability.

Step 7: Select Bus

- The user chooses the preferred bus.

Step 8: Select Seat

- The user selects seat from seat layout.

Step 9: Enter Passenger Details

- The user enters name, age, gender, etc.

Step 10: Choose Payment Method

- The user selects payment type (UPI / Card / Net banking).

Step 11: Payment Page

- The user enters payment details.

Step 12: Payment Successful?

- If payment is successful → continue
- If payment fails → retry payment

Step 13: Retry Payment (If failed)

- The user tries payment again.

Step 14: Confirmation

- Ticket is booked successfully. • Passenger details are shown.

Step 15: End

- Booking process completed.
